VLSystems Honored with Microsoft Teamwork Award

IRVINE, CA—April 25, 2008—VLSystems, Inc., a Microsoft Gold Certified Partner, announced today they were awarded with the Microsoft Teamwork Award for the United States South Western Region. The honor was awarded by the Microsoft Southwest SMS&P General Manager Michael Clark at Microsoft’s Southern California Quarterly Partner Briefing in April.

Providing customers with solutions to solve their complex business problems sometimes requires multiple partners and Microsoft to work together. VLSystems’ ability to team together with SoftwareONE and Spinnaker, both Microsoft partners, has added value to a customer in the sporting industry, and it is for this project that they have won this award.

“We at VLSystems place a great amount of effort into cultivating effective and lasting partnerships. This signed customer agreement is a very exciting and huge win for VLSystems,” says Tom White, chief executive officer of VLSystems, “and to be recognized for our hard work and ability to team with multiple partners further solidifies how great this project truly is.

VLSystems has previously been awarded the Microsoft’s Managed VAR Partner of the Year Award and the Microsoft Outstanding Achievement Award for Teamwork.
