VLSystems Unveils New Corporate Identity

IRVINE, CA—March 19, 2008—VLSystems, a Microsoft Gold Certified partner and a Cisco Advanced Security Specialized partner, today formally unveiled a new brand identity and launched an updated website at www.VLSystems.com.

“The launch of our new identity marks an important milestone for VLSystems,” said Tom White, chief executive officer of VLSystems. “Coinciding with VLSystems’ 30 year anniversary, our new identity sends a message of stability but also freshness to our customers and business partners.”

The updated website will allow customers to interact with VLSystems on a deeper level. Aside from the basic corporate information, the website is loaded with useful content. The solutions page permits visitors to view and download literature outlining service and product offerings. Furthermore, the events page not only allows visitors to sign up for upcoming events, but also provides recordings of past events for those unable to attend to view the event content.

Strategic partnerships with leading hardware and software manufacturers have enabled VLSystems, for 30 years now, to provide their clients with comprehensive information technology solutions. The new website dedicates a page per partner to summarize the solutions that partner offers to meet the needs of the VLSystems customers.

To remain in the forefront of information technology, VLSystems focuses on providing customers with the latest technology news and highlights, now easily accessed through the website. The VLSystems quarterly newsletter is now hosted on the site for visitors to read, download, and also sign up to receive the emailed version. Press releases, announcements, and highlights are also available on the site for viewing.

About VLSystems, Inc.
